

2021 Sea Turtle Nesting Season - Location of Nest Predations

Map exhibits the location of predated nests that occurred during the Indian River County, 2021 sea turtle nesting season. Predation occurred within a 3.1 mile stretch of beach encompassing parts of the Archie Carr National Wildlife Refuge, County, State, and private lands. Colored parcels relate to which Agency owns the parcel. Red points represent sea turtle nests that have been predated by coyotes. Data is current as of October 14, 2021.
