VIA EMAIL

Mr. Himanshu H. Mehta, P.E.  
Managing Director  
Indian River County  
Solid Waste Disposal District  
1325 74<sup>th</sup> Avenue SW  
Vero Beach, Florida 32968

Subject: Indian River County Solid Waste Disposal District  
2017 Annual Permit Compliance and Monitoring  
Final Invoice

Dear Mr. Mehta:

Transmitted herewith is a project completion report for the above referenced project. This work was completed in accordance with the Continuing Contract Agreement for Professional Services between Indian River County (IRC) Solid Waste Disposal District (SWDD) and CDM Smith Inc. (CDM Smith), dated December 6, 2011 and extended on November 4, 2014, under Work Order No. CCNA2014-WO No. 7 dated December 20, 2016. This project completion report is to serve as additional information to the final invoice (Invoice No. 90030544).

IRC SWDD is required to perform environmental compliance monitoring and reporting for water and air quality in accordance with the IRC Landfill's operating permits. During calendar year 2017, IRC SWDD was required to submit semi-annual reports of groundwater and surface water quality at the IRC Landfill to the Florida Department of Environmental Protection (FDEP). This was done in accordance with Chapter 62-701.510, F.A.C., the Solid Waste Operation Permit for the Class I landfill (Permit No. 0128769-024-SO-MM) modified by the FDEP on January 14, 2016 [which includes by reference the Water Quality Monitoring Plan (WQMP) for the Class I landfill in Appendix 3 of the permit], and the Solid Waste Operation Permit for the construction and demolition (C&D) landfill (Permit No. SO31-0128769-021) dated September 17, 2012 [which includes by reference the Monitoring Plan Implementation Schedule (MPIS) revised March 7, 2011, in Appendix 3 of the permit].

During performance of this Work Order, the IRC Landfill was operating under a Title V Air Operation Permit (Permit No. 0610015-004-AV), which was issued on July 16, 2012, that contains monitoring and reporting requirements related to the landfill gas collection and control system. IRC

SWDD is required to prepare and submit the following to FDEP and the U.S. Environmental Protection Agency (USEPA), Region 4:

- Annual Statement of Compliance
- Annual Operating Report
- Annual Emissions Fee
- Visible Emissions Test

IRC SWDD is also required to perform miscellaneous sampling and monitoring activities in compliance with the solid waste operation permits and the Multi-Sector Generic Permit (MSGP) for stormwater discharge (FLR05G035-003).

This project included providing the required permit compliance and monitoring services under the following tasks:

- Task 1.0 - Project Quality Management
- Task 2.0 - Semi-Annual Water Quality Sampling and Reporting
- Task 3.0 - Title V Permit Compliance and Reporting
- Task 4.0 - General Technical and Miscellaneous Permit Compliance Assistance

#### **TASK 1.0 – PROJECT QUALITY MANAGEMENT**

Activities performed under this task consisted of those generally administrative functions required to assure that the project remained on schedule, within budget, and that the quality of the work products defined within this scope was consistent with CDM Smith's standards and IRC SWDD's expectations.

CDM Smith coordinated with IRC SWDD staff for project planning. Preparation of invoices and project administration was also performed under this task.

#### **TASK 2.0 – SEMI-ANNUAL WATER QUALITY SAMPLING AND REPORTING**

Under this task, CDM Smith assisted IRC SWDD with the semi-annual water quality sampling, monitoring, and reporting in accordance with Chapter 62-701.510, F.A.C. CDM Smith contracted with Ideal Tech Service, Inc. (ITS) to perform the groundwater and surface water sampling. The

Mr. Himanshu H. Mehta, P.E.  
November 8, 2017  
Page 3

samples were analyzed by Environmental Conservation Laboratories, Inc. (ENCO) under contract to IRC SWDD.

Water quality monitoring at the Class I landfill was performed pursuant to Specific Condition D of the Solid Waste Operation Permit for the Class I landfill (Permit No. 0128769-024-SO-MM) modified by the FDEP on January 14, 2016. The samples collected from the Class I monitoring wells were analyzed for the routine monitoring parameters listed in Paragraph II.7 of the WQMP and Chapter 62-701.510(7)(a), F.A.C. Water quality monitoring at the C&D landfill was performed pursuant to Specific Condition D of Solid Waste Operation Permit for the C& D landfill (Permit No. SO31-0128769-021), dated September 17, 2012. The samples collected from the C&D landfill monitoring wells were analyzed for the routine parameters listed in Chapter 62-701.730(8)(c), F.A.C. and Paragraph 9 of the Monitoring Plan Implementation Schedule (MPIS) revised on March 7, 2011.

The January 2017 semi-annual sampling event was conducted from January 2 to 5, 2017. For this event, groundwater samples were collected from the 12 intermediate-depth groundwater wells and 13 shallow groundwater wells at the Class I landfill and 10 groundwater monitor wells at the C&D landfill. A surface water sample was collected from the designated surface water sampling location. Water levels were measured in 58 monitor wells. A surface water level measurement was taken at Staff Gauge No. 12.

The July 2017 event was conducted from July 24 to July 26, 2017. For this event, groundwater samples were collected from the 12 intermediate-depth groundwater wells and 13 shallow groundwater wells at the Class I landfill and 10 groundwater monitor wells at the C&D landfill. A surface water sample was collected from the designated surface water sampling location. Water levels were measured in 58 monitor wells. A surface water level measurement was taken at Staff Gauge No. 12.

CDM Smith assisted IRC SWDD in coordinating the analytical testing activities with ENCO, notified the FDEP prior to sampling, reviewed and evaluated the analytical test results, and prepared the semi-annual reports. The January 2017 Water Quality Monitoring Report was submitted to the FDEP on March 30, 2017 and the July 2017 Water Quality Monitoring Report was submitted to the FDEP on October 11, 2017.

### **TASK 3.0 – TITLE V PERMIT COMPLIANCE AND REPORTING**

The Title V Air Operation Permit (Permit No. 0610015-004-AV) for the IRC Landfill contains monitoring and reporting requirements related to the landfill gas collection and control system. In accordance with the Title V permit, CDM Smith assisted IRC SWDD, as described below, in fulfilling all air permit requirements and conditions within the required regulatory timeframes.

Mr. Himanshu H. Mehta, P.E.  
November 8, 2017  
Page 4

#### Statement of Compliance

CDM Smith prepared and submitted the Statement of Compliance for the reporting period of January through December of 2016 for the IRC Landfill to the FDEP on March 1, 2017 in accordance with Rule 62-213.440(3)(a)(2), F.A.C.

#### Electronic Annual Operating Report (EAOR)

CDM Smith prepared and submitted the 2016 reporting year EAOR for the IRC Landfill to the FDEP on March 24, 2017.

#### Annual Emissions Fee

CDM Smith prepared and submitted the 2016 reporting year Title V fee to the FDEP on March 27, 2017.

#### Visible Emissions Testing

CDM Smith contracted with TRC Environmental Corporation to perform the 2017 annual visible emissions test in order to determine the opacity of the flare. The 2017 visible emissions test was performed on April 14, 2017 and submitted to the FDEP on May 12, 2017.

#### **TASK 4.0 – GENERAL TECHNICAL AND MISCELLANEOUS PERMIT COMPLIANCE ASSISTANCE**

CDM Smith provided general technical and permit compliance assistance to IRC SWDD staff on an as needed basis. Under this task, CDM Smith performed quarterly monitoring of the landfill gas migration monitoring wells located at the IRC Landfill site boundary, as well as enclosed structures located on site, and submitted reports of the results to the FDEP. The reports were submitted to the FDEP on March 23, 2017, June 21, 2017, and September 18, 2017.

CDM Smith provided general technical assistance for the Year 2 – 2016 monitoring period of the Multi-Sector Generic Permit (MSGP) for stormwater discharge. CDM Smith compiled the Discharge Monitoring Reports for the Year 2 - 2016 monitoring period and prepared the 2016 Annual Discharge Report, which was submitted to FDEP on March 6, 2017.

CDM Smith also provided some initial evaluation of the exceedances of the Maximum Contamination Levels for sodium and benzene in one of the C&D debris landfill's groundwater monitor wells. This work also included preliminary discussions with FDEP. CDM Smith is currently continuing with this work under the Evaluation Monitoring for The C&D Debris Landfill Work Order.

Mr. Himanshu H. Mehta, P.E.
