Himanshu H. Mehta
Managing Director
1325 74th Avenue SW, Vero Beach, FL 32968

Dear Himanshu,

Republic Services of Florida, LP. (“Republic Services”) is pleased to submit this formal request to Indian River County (“IRC”) for Republic Services to deliver Recyclable Materials collected within the City of Palm Bay to IRC’s Transfer Station located at 1325 74th Avenue SW, Vero Beach, FL 32968. Republic Services would request approval of the following terms, subject to a mutually agreeable final contract:

- The price per ton for receiving the Recyclable Material would be \$90.00 per ton. The approximate tonnages of Recyclable Materials from the City of Palm Bay are 8,000 tons annually.
- Contaminated loads would be assessed at \$40.00 per ton and delivered to IRC’s landfill, located at 1325 74th Avenue SW, Vero Beach, FL 32968. Contamination percentage would be visually assessed upon delivery and an immediate determination would be made to comply with the current agreement in place between IRC and St. Lucie County.
- The preferred length of the contract would be 5 years with a 5-year bi-lateral renewal to run concurrently with Republic Services’ existing 10-year contract with the City of Palm Bay. Contingent an approved amendment between IRC and St. Lucie County.
- Republic Services supports the need to upgrade the IRC Transfer Station to a more permanent facility to avoid the loss of materials due to weather. Republic Services is open to discussing some transition cost assistance with the relocation of the existing single stream transfer station. Also, understanding that the operations of the new facility will require a contract amendment to cover the additional services.

Upon approval, the parties will begin work on the drafting, negotiation, and finalization of a formal contract, executed by both parties, which is expected to be completed by October 1, 2020. Each party will bear its own costs and fees incurred in the drafting and negotiation of the contract.

Republic Services would also like to explore the option of delivering single-stream Recyclable Materials to the Fellsmere Customer Convenience Center (CCC) site. With small modifications

needed in order to deliver single-stream Recyclables to the Fellsmere CCC site, Republic Services would request a rate be established now for the IRC transfer station. Thereafter, the parties would explore the use of Fellsmere CCC location.

We look forward to working with IRC on the above matters. Please do not hesitate to reach out with any questions you may have.

REPUBLIC SERVICES OF FLORIDA, LP
