Justification of Change Statement

7750 9th St. SW

The 17.31 acre parcel, 33382400001015000001.1, is currently zoned light industrial(IL) and A-1. We propose rezoning of 3.73 acres from A-1 to Commercial Heavy (CH). Currently there is an existing building within the A-1 zoning designation on the parcel. Rezoning the 3.73 acres allows the building to be utilized for commercial use while still allowing an A-1 buffer between the industrial zoned land and the A-1 parcels to the north.

The proposed use of the property is an aluminum tower manufacturing facility. The business receives aluminum tubing, and they weld them together to create different types of radio towers. They have in-house engineering which will design a product per a client's request. This will range from the telescoping towers you see on news vans to towers utilized by the military for radio signals. They also construct trailers that contain portable towers which range from solar powered towers to military spec units. They will do all electrical and mechanical construction in house. They receive parts from different manufacturers and construct the different products in their shop.
