Grant	What to look for	5	3	1	Missing
Question(s)					
8-11	How does the program align with the funding priority, and what evidence supports the need for the service? Provide detailed information on how the program meets the identified need.	The program is strongly aligned with the funding priority, with comprehensive research and data that clearly support the need for services. The program description is clear, detailed, and thoroughly explains how the program will address the identified need for services, leaving no ambiguity.	The program shows general alignment with the funding priority, with some research or data provided, though it may be limited or not fully convincing. The program description is adequate but lacks depth or detail in explaining how it will address the need for	The program is not aligned with the funding priority, with no research or data to support the need for services. The program description is unclear or incomplete, and it does not explain how the need for services will be addressed.	
14	Describe the research-based best practices that your program follows and provide data or evidence that demonstrates the effectiveness of these strategies in achieving the desired outcomes.	The program clearly outlines research-based best practices and provides comprehensive, relevant data that strongly demonstrates the effectiveness of the strategies in achieving desired outcomes. Evidence is current, credible, and directly supports the proposed methods	services. The program describes research-based practices and presents some data to show effectiveness, but the evidence is either limited in scope or not fully aligned with the strategies.	The program does not describe research- based practices or provide data to support the effectiveness of the strategies. No credible evidence is presented.	
15	Who is the target population and how are they	methods. The target population is clearly defined with specific	The target population is identified, but with limited	The target population is not clearly identified, and

		and have proven			
		effective in			
10.10	1.1	reaching them.			
16-19	How does your program ensure accessibility for participants, including considerations for transportation, waitlists, fees, location, and hours of operation? (Separate these out)	The program comprehensively addresses all aspects of accessibility, including providing transportation options, minimizing or eliminating waitlists, offering affordable or sliding-scale fees, and ensuring that the location is convenient and hours are flexible to meet the needs of the target population. Solutions are well thought out, and there is clear	The program addresses some accessibility factors but lacks full coverage of all key areas. For example, transportation or fee assistance might be addressed, but there are gaps in addressing waitlists, location, or hours.	The program does not address accessibility in a meaningful way. Transportation, fees, location, waitlists, or hours are not considered, resulting in significant barriers to access for the target population.
