

**2026 CHEVY SILVERADO 2500HD REGULAR CAB PICKUP 4WD WT 8'
EXTRA OPTIONS**

The extra options listed for the proposed sign on-call truck are meant to make the vehicle safer, more useful, and better suited for the work my staff. It also is a mirror description to the old truck (Fleet #029) the only difference being gas and not diesel. Gas being the preferred option.

Here is a rundown in the order shown on the quote:

1. Crane – The small crane on the back of the truck will help lift and set heavy signposts, preformed concrete bases, and other large equipment. This makes the job easier and keeps staff from having to lift heavy items by hand. Note – this will be the only crane our department will have.
2. Utility Bed – The utility bed gives us secure, organized storage for tools and parts. It helps keep everything in one place so staff can find what they need quickly while out in the field. Since this truck is taken home by staff for on-call duty, having a utility bed lock ensures tools always stay secure. Also, with multiple people driving this truck, the setup allows everyone to know exactly where tools and materials are stored.
3. Trailer Wiring/Class V Hitch – This is because of the utility bed. By adding these the trailer package can still be used.
4. Spray-In Bed Liner – The liner protects the bed from scratches, rust, and damage caused by loading and unloading materials. It helps the truck bed last longer.
5. Over-Cab Light Bar & strobes – The light bar along with the strobes are essential for better visibility when working in and on the side of the roadway. This allows the truck to be seen more easily by drivers and improves safety.
