

**GKE Osprey Marsh Maintenance / Compliance Proposal**  
**(12 months / October 2016 – September 2017)**

December 10, 2014

Revised December 23, 2014

Revised April 18, 2015

Revised September 30, 2015

Revised November 7, 2015

Revised October 13, 2016

**TASK I:**

**Twelve (12) Month (Oct. 2016 – Sept. 2017) Onsite Exotic Control (following 2<sup>nd</sup> year of work start up)**

Beginning on the date of final acceptance of all landscaping by the OWNER (September 2015), all existing and future exotic plants will be destroyed on the project site for a period of four (4) years. As a minimum, exotic elimination will be performed monthly. All exotics will be killed at the site using methods approved by both the OWNER and St. Johns River Water Management District (SJRWMD) (i.e. hand remove or lightly spray with SJRWMD approved herbicides) and the project site (planted area) will be kept (80%) free of exotics. Special care will be taken not to disturb birds, nests and other wildlife.

**\$1,300.00 per month x 12 months = \$15,600.00**

**TASK II:**

**Trim and Maintain Buffer Trees & Shrubs at 8 ft. per USFWS Approval / Conditions (4 years)**

Annual trimming of planted oaks and wax myrtles in all surrounding planted buffer areas to 8 ft., per USFWS requirements. All trimming will be collected and taken to the County Landfill for disposal.

**\$2,150 per annual event (No trimming has been required to date.)**

**TASK III:**

**Annual Application of Polyacrylamide to Prevent Erosion of Sloped Areas**

Beginning on the date of final acceptance of all landscaping by the OWNER (Oct. 2015), Polyacrylamide will be applied to sloped ground surfaces and other areas susceptible to erosion, in a manner recommended by the supplier, to minimize the potential of erosion of the ground surface resulting from heavy rainfall, on an “as needed” basis, not to exceed one treatment / 12 months. The Polyacrylamide used shall be the anionic type and the particular type shall be matched to the site soil by the supplier. Polyacrylamide application shall be applied periodically as determined necessary by the OWNER and GKE. **\$675.00 per application as needed.**

(2014 cost of Polyacrylamide per bag is \$350, based on current price. It’s anticipated that each application will require 1 bag.)

**Method and Amount of Compensation**

G.K. Environmental, Inc. proposes to provide the outlined Scope of Services based on the following fees:

Task I. Onsite Exotic Control	\$ 15,600.00
Task II. Trim & Maintain Buffer Trees & Shrubs	\$ 2,150.00
Task C. Application of Polyacrylamide	\$ 675.00

**TOTAL FOR THE 10-ACRE SITE: Twelve (12) Months (Oct. 2016-Sept. 2017) =  
\$18,425.00 for Maintenance and Compliance**
