All chassis are subject to availability.				
Quoted body pricing is valid for 30 days from receipt or until the next data release.				
Chassis pricing for PL Supplied chassis is subject to any OEM chassis manufacturer surcharges and model year increases.				
An ambulance or rescue vehicle order, submitted utilizing a chassis that cannot be provided or ordered, (chassis order banks not open, no available allocation, or otherwise unknown), will NOT be processed until such time that the chassis can be ordered and assigned.				
Upon receipt of chassis VIN and firm chassis production schedule, or chassis receipt, the vehicle order can then be considered "buildable".				
Once entered into "buildable" order status and when loaded into the PL Custom production schedule, prioritized by order entry date, the body can then be processed for approval and priced on most current pricing and data release in place.				
This applies to both PL Custom and customer/dealer supplied chassis.
