

# RECYCLING TIPS

from the Solid Waste Disposal District (SWDD)

## DO NOT THROW VAPE PENS IN THE GARBAGE OR RECYCLING CART!

They contain **lithium batteries**, which can catch fire, especially when damaged. When placed in household trash and recycling bins, lithium batteries often get damaged by trash compactors and can cause fires during transportation, as well as at waste and recycling facilities.

**For proper and safe disposal  
bring your vape pens to:**

- One of the 5 Customer Convenience Centers
- Main Landfill
- Participating Retail Outlets
