TrafficJet™ – Simple, clean and cost-effective. Warranted durability

Avery Dennison's TrafficJet™ print system offers incredible value, with an economical upfront and efficient running cost. TrafficJet spot colors are engineered to meet the color, retroreflectivity and durability requirements of the traffic industry's rigid specifications. Signs produced using TrafficJet carry the same warranty as signs produced by screen printing and colored overlay films. Our exclusive position as the system supplier guarantees performance compatibility between printer, inks, reflective sheeting and protective overlay when needed.

Engineered to meet your sign fabrication needs

- MUTCD compliant signage
- Easy, efficient sign fabrication
- Improved labor and material efficiency – no cutting, premasking or weeding
- Quick order turnaround – direct to print from design
- Lower operating costs – produce just in time instead of just in case
- Print unattended and manage multiple printers with a single operator
- Print signs in any orientation on our Omni-Directional sheeting, maximizing space while optimizing retroreflectivity
- Only system engineered and supported by an industry-leading sheeting manufacturer – complete with ten and twelve year sheeting durability warranty
- Now with CMSpot6™, the only traffic printer that offers simultaneous spot and process color printing for unsurpassed durability and flexibility. Spot colors for traffic signs are warranted up to 12 years, and process color images are warranted up to 10 years (depending on sheeting series).
- Ideal for multi-color signs and complex street name signs with variable information

Preparation for your TrafficJet™ Print System

- Request the TrafficJet Pre-Site Checklist #1.03 from your Avery Dennison sales representative

Lead time

- Printer and installation lead time is 15 to 20 working days after order
- Inks ship within 5 days of receipt of order

Once your order is confirmed

- A technical service representative will contact you to in order to complete the pre-site checklist, and schedule installation and on-site training
- Your TrafficJet™ Print System will arrive on two pallets;
  1. Printer with software
  2. Installation kit including inks, flush, and reflective sheeting
- Important! Do not attempt assembly of the printer prior to the arrival of the technical service representative, do not open any packages to ensure that all parts and materials are accounted for

During installation

- **The technical service representative will be on-site to assemble the printer, load software and inks, and provide training on operation and maintenance**
