Re: Concrete Crushing - 2021 – Request for Rate Increase

Himanshu:

Thank you for the opportunity to provide crushing services to your department. Your team has been excellent to work with and I am excited that we have the chance to work together again.

Our costs for labor, fuel, and equipment (parts and service) have increased significantly since our original contract was authorized in 2019. I am requesting a three percent (3%) increase to our original contract amount of \$8.67 per ton of crushed material. If accepted, the updated price would be \$8.93 per ton of crushed material.

Let me know if you have any questions.

Sincerely,

SITECRAFTERS OF FLORIDA, INC.

James T. Kempton
