

MEMORANDUM

TO: Jason E. Brown, County Administrator

FROM: Richard B. Szyrka, P.E., Public Works Director

SUBJECT: Florida Department of Transportation (FDOT) Maintenance Memorandum of Agreement (MMOA) for Oslo Road Widening Project
Financial Project No. 431521-1

DATE: October 24, 2022

DESCRIPTION AND CONDITIONS

The Florida Department of Transportation is in the final stages of design for the Oslo Road Widening project and is preparing to move the project forward for construction in 2023.

Florida Department of Transportation requires that the local agency governing board approve a resolution accepting the attached Maintenance Memorandum of Agreement (MMOA) outlining conditions for the acceptance and maintenance of the project after construction is complete.

The attached MMOA is for the Florida Department of Transportation to construct the Oslo Road widening project which includes two travel lanes in each direction, 7-foot bike lanes, sidewalks, signalization at 66th Avenue, drainage improvements, stormwater retention ponds, roadway lighting at intersections, pedestrian crossings, and other related improvements. Once the project has been constructed by FDOT and the final acceptance process has been completed, the County will be responsible for the maintenance of all improvements associated with the project.

FUNDING

Once the project is complete and accepted by Indian River County, the maintenance expenses for maintenance of Oslo Road will be included in the Public Works Road and Bridge budget.

RECOMMENDATIONS

Staff recommends the Board of County Commissioners approve the Authorizing Resolution for acceptance of the MMOA and authorize the Chairman to execute the same.
