RE: Nexusworx Phase II Project

Gerelcom, Inc. proposes a budgetary value for the Phase 2 work of verification of splices within approximately 105 handholes throughout the county to be \$171,438.00. This is based on the value of the work completed during Phase 1 of the project plus a 5% increase in our costs. The average splice verification value is \$1,632.74 per location. Any variation in the quantity of locations needed to be surveyed will be added, or deducted upon final invoicing.

Please do not hesitate to call with any questions or concerns.

Sincerely,

*Bryan Lanham*
