Subject: Planting of native plants at entrance of building A

CAUTION: This message is from an external source. Please use caution when opening attachments or clicking links.

Good evening to all our County Commissioners;

We at the Garden Club of Indian River County fully support pelican Island Audubon's exciting new initiative to plant two native gardens at the entrance to the Indian River County Administrative Building A to demonstrate to the public the beauty and value of native plants in our environment, a model for everyone's public and private spaces. Pelican Island Audubon will provide the funds for a professional landscape architect as well as the plants. The objective of these gardens is to demonstrate how native plants can be attractive to the public and a way to reduce harmful chemical into our lagoon.

Peggy A. Gahn, President

Garden Club of Indian River County 2526 17th Avenue,, Vero Beach, FL 32960
