Education

I attended the University of North Carolina at Asheville and earned a Bachelor of Science Degree in Environmental Studies with a Natural Resource Management Focus. I am a graduate of the Center for Disease Control's Environmental Public Health Leadership Institute and have taken master level courses from the University of South Florida.

Licenses/certifications

I hold certifications from the Florida Department of Health in numerous areas including food service, biomedical waste, and onsite sewage and disposal to include permitting and inspections. I also am accredited as a Registered Sanitarian (R.S.) and am part of the emergency response strike team for FL.

Professional Experience

I have been employed by the Florida Department of Health in Indian River (DOH-IR) since January 2004, initially as an Environmental Specialist. In July 2020, I assumed the duties of Environmental Health Manager at DOH-IR to lead and supervise the DOH-IR Environmental Health Division. My duties also include supervision over accreditation, community health improvement planning and serving as the Statewide PACE EH Coordinator for the Florida Department of Health since 2006. My early experience as a park ranger assistant in Washington state helped ignite my passion for protecting our environment and safeguarding our communities which collectively has led to over 20 years of experience in the field.

Publications and Research

I have been involved in securing over \$40 million of grants for communities in FL. Please view the Indian River County link at: <http://www.floridahealth.gov/healthy-environments/pace-eh/index.html>
