RE: IRC Right-of-Way Permit No. 2025020013

Culver Replacement

Mr. Molinari:

The Engineering Division of Indian River County has approved the above referenced right-of-way permit application. However, <u>THIS PERMIT HAS NOT BEEN ISSUED and NO WORK IN THE RIGHT-OF-WAY is authorized at this time</u>. One of the standard permit conditions requires the permittee to notify the County a minimum of 72 hours (3 business days) prior to the start of construction in the right-of-way. When ready, please complete the attached "Notice of Commencement" form and forward to <u>IRCPWROWUTL@indianriver.gov</u> for processing. You will be notified once work in the right-of-way is approved.

Please note that in some instances we will request a brief onsite meeting the day of construction start to discuss and clarify the conditions of the permit and answer any questions you and/or your contractor may have.

It is our intention to work with all utility providers to ensure the safe and efficient delivery of services to the residents and businesses of the County while maintaining the quality of existing infrastructure and minimizing the disruption to the community.

Sincerely,

Wendy S. Smith

ROW Permitting Administrator
