Hi Johnathan,

We have acquired our **Honda Pioneer 700-4** and it is currently at the IRC Sherriff's Department getting the vinyl lettering to make it look official. After that we are having it treated for rust prevention and should be ready to use in the next couple of weeks. We would like to keep the unit in one of your utility buildings, either the Tracking Station or the new Golden Sands location. We are willing to allow IRC Ocean Rescue full use of the SxS whenever it is needed. Please let me know if you need any other information from me. We appreciate the ability to work with you to make IRC beaches safer for everyone who uses them!

Thanks,  
Justin Lefebure
