Previous life in commercial world (32 years)

1981-2012: CEO & Acted as Sellers Agent (banker) selling my family business Powers Fasteners to SWK on May 31st 2012 for 11.8x EBITDA all cash \$225m with 7% in holdbacks. Afterward I managed a four-month transition as CEO of Powers Fasteners globally under new ownership by Stanley Black and Decker until Sept 28th 2012 with responsibility for integration and P&L globally. I departed early because my work was completed (leaving a 3 year agreement on amicable terms). I delivered and transitioned an entity with operations in 9 countries, 17% per annum five year organic YOY revenue growth and 46% gross margin & most importantly the SWK board financial target was met during the stub year with them as owners. I began my career in 1981 at small business, Rawlplug, owned by my father (my mentor) and in 1987 took over as President providing for his retirement, an orderly transition, purchase of his equity and changed the name to Powers Fasteners Inc. which I ran with my brothers until I sold it in 2012.
